1. ***What are 3 HTML elements not mentioned any of the video this week? What do they do and how are they used?***

    a. ***Iframe***: This allows a nested browsing context — embeds another HTML
                                       page into the current HTML page.

   `<iframe src="link.html" width="200" height="200"></iframe>`

        <u>**Results**</u>: —>

    b. ***Definition list***:
        `<dl>`
        `<dt>Cello</dt>`
        `<dd>The second largest string instrument</dd>`
        `<dt>Cellist</dt>`
        `<dd>A person who plays the Cello</dd>`
        `</dl>`

        <u>**Results**</u>:
            Cello
                The Second Largest Stringed Instrument
            Cellist
                Someone who plays the cello

    c. ***Underline text***:
        `<p><span style="text-decoration: underline;">Underlined text</span></p>`

        <u>**Results**</u>: <u>Underlined text</u>

2. Choose one of your favorite websites and identify 5 different HTML elements used on the website. Make sure to include the URL in your submission.

    a. URL: https://trinitynh.org/

    b. Elements:
           i. <button>
           ii. <span>
           iii. <div> (split up the page into sections)
           iv. <link> — links to jump from page to page
           v. — on the food pantry page, list of items to donate

3. What is your favorite thing you learned this week?

How to change the color of headers.
